SCALE FOR PROJECT PISCINE SWIFT IOS (/PROJECTS/PISCINE-SWIFT-IOS) / DAY 02 (/PROJECTS/PISCINE-SWIFT-IOS-DAY-02)

You should evaluate 1 student in this team

Git repository

vogsphere@vogsphere.w€ 

Introduction

For the smooth running of this evaluation we ask you to respect the following :

- Stay courteous, polite, respectful and constructive in all situations during this exchange. The relationship of trust between community 42 is something you depend on.
- Highlight to the person(or group) find eventual dysfunction of getting the work done, and take time to discuss and debate them.
- Accept that there may be differences in interpreting the subject's requests or the scope of the features. Stay open-minded to the vision of the others (is he right or wrong?), and evaluate the most honestly possible. The pedagogy of 42 make sense only if the peer-evaluation is done seriously.

Guidelines

- You should only evaluate what is on the GiT repository of the student or the group.
- Make sure to check that the GiT repository is the one corresponding to the student or group and the project.
- Meticulously check that no malicious things have been used to mislead you and make you evaluate something other than

the official content.

- Any script intended to facilitate the evaluation provided by one of the two parties must be rigorously verified by the other party to avoid some unpleasant surprises.
- If the student/ corrector has not yet done this project, it is mandatory for the student/corrector to read the subject in full before beginning this defense.
- Use the available flags to sign something rendered empty, non-functional, a case of cheating, etc. In this case, the assessment is completed and the final mark is 0 (or -42 in the special case of cheating). However, except in the case of cheating, you are encouraged to continue to discuss the work that has been done (or not done) to identify the problems that have led to this situation and avoid them for the next rendering.

Exercise 00

TableView

- We see at least 3 people (name and description) in the view table?

☒ Yes

☐ No

Exercise 01

Turn the page

- A navigation bar is present?
- Is there a title on all the views?
- Can we go back from the second sight?

☒ Yes

☐ No

Exercise 02

Who will die?

- Can we write the name of the person ?
- Can we write the description of the death of the person on several lines ?
- Is a date picker present ?
- Can we select a past date ?
- When we click on the "Done" button, the info is displayed in the console or in the table view ?
- Check if the application can be used on all devices.

☒ Yes☐ No

Exercise 03

You will die

- Can we add someone at the table view? (only the name and description for the moment)
- If we do not get a name, nobody is added ?
- If the description field is empty the person is still added ?
- There should be no Back button in the navigation bar of the view of the view table.

☒ Yes☐ No

Exercise 04

Custom Death

- The cells are Custom ?
- We also see the date of death ?

☒ Yes☐ No

Exercise 05

Unleash your power

- Cell heights are dynamic ?
- Can we see the full description content regardless of its number of line?

☒ Yes☐ No

Ratings

Don't forget to check the flag corresponding to the defense

★ Outstanding project

Empty work

Incomplete work

Cheat

Crash

Forbidden function
